## Contains DPA

Seal oil is one of the only sources (like mother's milk) with naturally occurring high levels of DPA.

## 100% Canadian

Seal oil originates from Canada's pristine waters, unlike most Omega-3 fish oil.

## Preserved purity

Most Omega-3s on the market are chemically altered. Seal oil is 100% natural and pure.

## Optimal absorption

Seal oil is more easily absorbed and digested by pets compared to fish oil because of its mammalian molecular structure.

# The Power of DPA

Seal oil is a complete source of Omega-3 (DPA + DHA + EPA) that will keep your pet's skin and coat healthy and promote overall wellness.

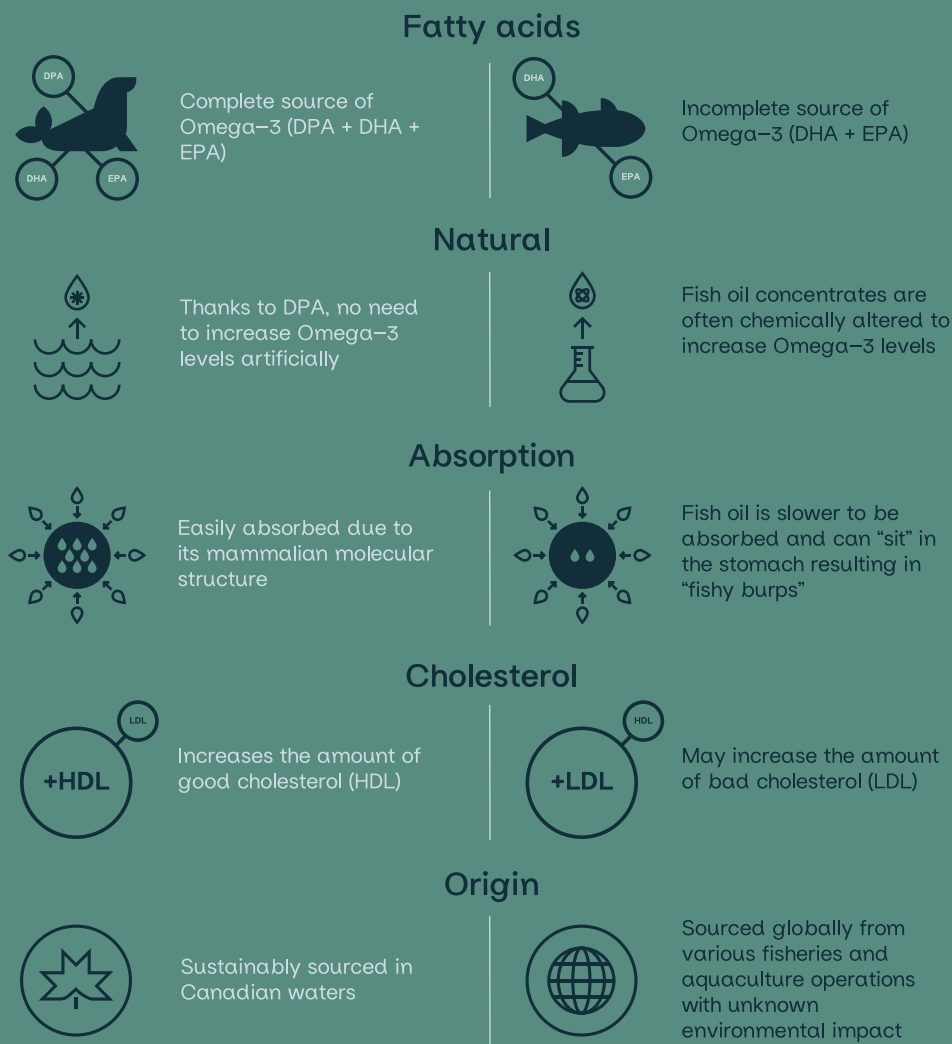

# Premium quality

Canadian Seal Products registered vendors offer Seal Oil Omega-3 for Dogs and Cats made from the same premium quality seal oil used for human products.

# Health Canada Approved

Seal oil is approved by Health Canada and is well below the most stringent industry limits for heavy metals like mercury, lead, cadmium and arsenic and the World Health Organization's limits for PCBs, dioxins and furans.

## Seal Oil vs. Fish Oil

## Helps repair blood vessels

Data show that DPA helps to achieve maximal endothelial migration, a critical function in repairing blood vessels\*.

## 10x more effective than EPA

Studies have shown that the same health results are achieved using just 1/10th the amount of DPA compared to EPA\*.
